# **HTT CHIPSEQ ANALYSIS**

## **WT & Q111het & QQ**

Amol Carl Shetty

August 17, 2021

# Dataset Descriptions

- Dataset 1 (GSE102750)

<b>Samples</b>	11	
<b>Conditions</b>	Wt ChIP	3 replicates
	Wt_Input	2 replicates
	Q111het_ChIP	4 replicates
	Q111het_Input	2 replicates
<b>Matched ChIP-Input samples</b>	No	
<b># Sequencing Runs / sample</b>	2	
<b>Sequencing Read Length</b>	25	
<b>Tissue</b>	Striatal	

# Dataset Descriptions

- Dataset 2 (Genewiz :: HD-ASO-Striatal)

<b>Samples</b>	4	
<b>Conditions</b>	STR-Wt ChIP	1 replicates
	STR-Wt_Input	1 replicates
	STR-Q111het_ChIP	1 replicates
	STR-Q111het_Input	1 replicates
<b>Matched ChIP-Input samples</b>	Yes	
<b># Sequencing Runs / sample</b>	1	
<b>Sequencing Read Length</b>	150	
<b>Tissue</b>	Striatal	

# Dataset Descriptions

- Dataset 3 (Genewiz :: 30-415606808)

<b>Samples</b>	12	
<b>Conditions</b>	Wt ChIP	3 replicates
	Wt_input	3 replicates
	QQ_ChIP	3 replicates
	QQ_input	3 replicates
<b>Matched ChIP-Input samples</b>	Yes	
<b># Sequencing Runs / sample</b>	1	
<b>Sequencing Read Length</b>	150	
<b>Tissue</b>	Striatal

# FUTURE STEPS

# Downstream Analysis

- On-going analysis
  - Finalize set of peaks to use for downstream analyses
- Future analysis (based on final set of peak calls)
  - Motif Analysis
  - Enrichment of Histone Mark regions
    - Existing ActiveMotif Histone Mark regions
    - Additional data from ActiveMotif for H3K9me? Delivery date?
